

Finally, A Better Way To Order Supplies

Stop the old way of ordering your supplies. Having someone walk around with a clipboard or order sheet, making notes of which supplies are running low, then manually entering the order into an ecommerce system is no way to run a tight ship. The risks are expensive: transposing figures from paper to keyboard can cause costly errors and buyers who ignore carefully negotiated supply agreements in favor of vendor “specials of the week” may save money on an item or two, but ultimately results in *higher* costs.

JumpCart automates your supply ordering process, leading to greater efficiency, lower costs and increased order accuracy. Simply scan a barcode for the supplies you wish to order using our compact keyfob scanner, then plug the scanner into your PC and upload the order. No more pen and paper, and no manually keying in orders.

The JumpCart Advantage

The JumpCart System helps decrease costs associated with inventory and supply management.

- Reduce requisition-to-order cycles
- Minimize inventory carrying costs
- Reduce labor associated with inventory and supply management
- Increase compliance with existing purchasing contracts

JumpCart works by using small key-fob barcode scanners to manage inventory automatically.

JumpCart can benefit virtually any organization, including yours. It's already in use in thousands of businesses including some of the country's largest retail companies, law firms, government organizations, healthcare facilities and educational institutions. These buyers save time and money every day by using JumpCart to automate their supplies purchasing.

Dramatic, immediate time and cost savings

Research has proven that automating your procurement process slashes requisition-to-order time by more than 60 percent and cuts costs by over 50 percent. And by reducing maverick spending and keeping supply purchases on contract, you can further reduce costs by anywhere from 5 to 20 percent.

Fits your unique needs

We provide everything you need to automate your procurement process and reduce the time and cost associated with ordering supplies. After taking the time to understand your business and current order process we will provide the following:

- **Custom Catalogs:** we'll work with you to create a supplies catalog tailored to your organization's needs, including the items, brands and models that are consumed in your business. Custom catalogs save you money by keeping your purchases focused on those items that work best in your business.
- **Labels:** we supply barcode labels to attach to shelves where you keep supplies. We will also put them on equipment such as printers and copiers, or anywhere supplies are used, making the reordering of these supplies just a simple scan of a barcode.
- **Barcode scanners:** compact keyfob scanners can be easily carried on a keychain or lanyard and are extremely easy to use.

The JumpCard system can be customized to the way you order supplies. Rather than redesigning your ordering process, we automate your existing process so there is minimal training required or disruption to existing operations. And because our procurement solution is integrated with our eCommerce site, there is no software for you to buy or maintain.

A breeze to use

The compact keyfob scanner has only two buttons, so it's easy to carry and simple to use. Scanning barcodes automates the ordering process. You can scan bar codes from shelf labels, out of your custom supplies catalog or from our full line catalog. The scanner stores the items needed.

When finished scanning items you wish to order, you simply plug the scanner into the USB port on your computer and your order is automatically uploaded to our eCommerce site. All of the items you scanned are loaded into a shopping cart on our site. Simply review your order, make any changes you need, and submit it. Scan – Dock – Buy, its that simple!

Start reducing the cost of managing supplies today. Ask us to conduct an analysis of your businesses supply processes and we will return with a procurement solution that is designed specifically for your business and guaranteed to save you money.

JumpCard is as easy as scan, dock and buy.
No more manually entry of your orders.

MAKING IT HAPPEN
