

Install Confidence... Operate Smoothly

Printer Fleet deployments, device relocations, and device removals can be disruptive to any organization. IT Departments and Office Managers are already overburdened just keeping day-to-day operations running smoothly. Our Print4 Installation and Deployment Services optimize your time and staff resources, while minimizing the chaos of a large multi-site or campus-based deployment.

We customize the scope of work based on your needs. Our complete lifecycle project management and hands-on implementation streamline device acquisition, staging, delivery, installation, configuration, and user training.

Decommissioning and Removal Services

Printer fleets need to adapt to changes in customer growth, greening initiatives, and/or rightsizing. Our team assists with decommissioning and removal of devices that longer meet your business needs. Services include cleansing or removing of output device drives, removal and capturing capital asset data. We can repackage, store, and ship retired devices for recycling to adhere to government regulations or to possibly lower new device acquisition costs through manufacturer trade-in programs.

“We remove the burden of equipment acquisition, staging, delivery, installation, configuration, and user training.”

- We offer complete solutions for the acquisition and deployment of large printer fleets
- We customize our services to your match your business needs
- We coordinate all staging, delivery, install, configuration, and user training
- Each device is documented for its features, location, accessibility, and network connection
- Perfect for networks with 150+ printers and output devices

Installation, Deployment, and Removal Services

FAQs	Feature	Benefit
What is it?	A customer-fitted service that provides a custom scope of work and a full compliment of device installation, deployment and removal options.	We are highly experienced in handling large scale projects so IT Departments and Office Mangers can focus on running the business.
Who is this for?	Multi-site or Campus based networks with 150+ printers and output devices.	We remove the burden of equipment acquisition, staging, delivery, installation, configuration, and user training.
Why do I need it?	We provide complete lifecycle project management and hands-on implementation.	Installing, redeploying, and removing printers can be disruptive to an organization. Our experts remove the chaos associated with large scale print environment changes.
What is the value?	Complete asset documentation and tracking of moves, adds, and changes.	Each device's attributes, features, location, accessibility, and network capability are documented. We streamline deployments and follow through with lifecycle support.
How do I begin?	Contact us today!	Our commitment to the partner ecosystem guarantees the best technology, services, and ongoing support.

“A quality Installation Partner for Managed Print Services goes beyond opening the box and turning on a printer.”
